

# ABSTRACT OF THE DISCLOSURE

Area names and classified facility names which are fed in through a given procedure are recognized as a narrowing-down condition by simultaneously referring to all of the category name dictionary and area name dictionary as a narrowing-down dictionary in order to acquire the number of facilities satisfying the narrowing-down condition. When the number of facility names is equal to and smaller than the predetermined number of facilities, a facility name dictionary is prepared and the voice recognition processing of the facility name received with voice is performed by the use of the facility name dictionary thus prepared.
